

Report of 16th EFORT Congress 2015.

First, I would like to thank AADO to grant me a 2015 travelling scholarship to attend the 16th EFFORT Congress. This year, the meeting was held in a beautiful city, Prague being capital of Czech Republic from 27th -29thMay 2015. There were more than 4000 participants from mostly European countries.

The main theme of this year's congress is infection. This complication in surgical procedures in orthopaedic and traumatic condition is a major issue and concern in our daily orthopaedic practice. There are more than 15 concomitant session each time especially infection, arthroplasty and trauma. Besides, there are more than 1000 posters displayed inside the convention center. Numerous commercial exhibition booth demonstrating latest product design in various orthopaedic subspecialty can be seen, some of which are very innovative.

Overall, the congress was well organized and educational. It was valuable for any orthopaedic colleague who would like to broaden their knowledge in their own subspecialty or other subspecialty as well.
